

# Barriera fotoelettrica di sicurezza

## F3SG-R

- Resistente alle torsioni per un facile allineamento
- Utilizzo del codice QR per una facile risoluzione dei problemi
- Cavi smart-click per una facile installazione

# Installazione facile e veloce

Le barriere fotoelettriche di sicurezza possono essere utilizzate per soddisfare gli standard di sicurezza dei macchinari, ma possono essere difficili da installare e mantenere. Per questo abbiamo ripensato, riprogettato e reinventato la nostra serie F3SG-R, con caratteristiche speciali e funzioni intelligenti che ti aiutano a selezionare, installare e mantenere la barriera fotoelettrica in poco tempo e con la minima fatica. Per esempio, ora utilizziamo attacchi a baionetta a scatto (Smart-click) per un'installazione rapida. Inoltre, i nuovi corpi resistenti alla torsione contribuiscono a garantire un allineamento senza problemi. Ma non è tutto...

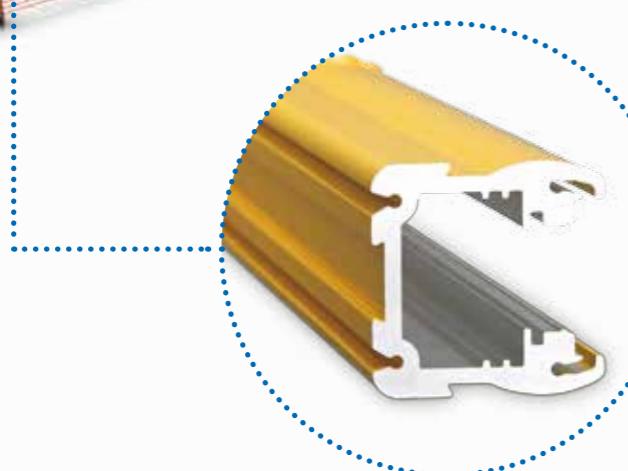

## Altre caratteristiche essenziali

- Versione avanzata con quattro muting diversi, ideale per la massima flessibilità
- Versione semplice per il facile rilevamento ON/OFF
- 100 m di cavo per agevolare l'installazione e il cablaggio
- Distanza di rilevamento fino a 20 m
- Sincronizzazione ottica per un facile allineamento
- Protezione IP67 per garantire affidabilità in ambienti polverosi e di lavaggio

### Resistente alle torsioni per un facile allineamento

La costruzione estremamente rigida elimina i problemi di torsione dall'alto verso il basso. Questo consente di installare la barriera in modo più semplice e veloce e previene il disallineamento incrementale dell'asse ottico causato dalle vibrazioni nel tempo.

### Codice QR per una facile risoluzione dei problemi

In caso di problemi, potrai semplicemente scansionare con lo smartphone il codice QR riportato per andare direttamente alla pagina Web dedicata alla risoluzione dei problemi, disponibile in otto lingue: cinese, coreano, francese, giapponese, inglese, italiano, tedesco e spagnolo.

### Connessione dei cavi Smartclick® per una rapida installazione

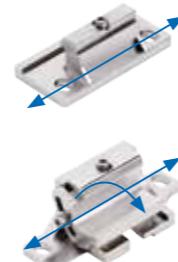

Non richiede controllo della coppia di serraggio: i connettori Smartclick collegano i cavi con una semplice torsione di 1/8 di giro del connettore impermeabile M12. Questa connessione riduce il tempo necessario per collegare tra loro numerosi dispositivi.

# Caratteristiche e vantaggi della gamma

## EASY | ADVANCED

### Facile regolazione, anche dopo il montaggio

Le staffe di montaggio fisse fornite in dotazione consentono di regolare verticalmente la barriera fotoelettrica di sicurezza facendola scorrere verso l'alto o verso il basso; le staffe di montaggio regolabili opzionali consentono regolazioni orizzontali e verticali di  $\pm 15^\circ$ .

## EASY | ADVANCED

### Scelta della capacità di rilevamento

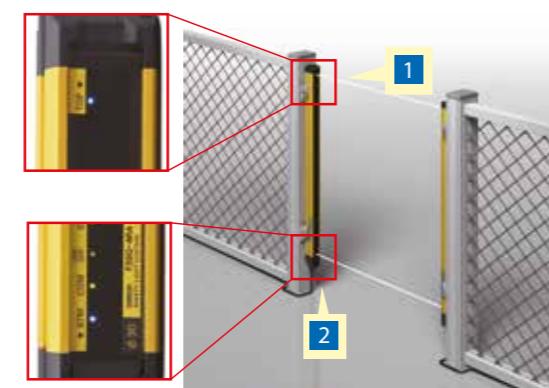

- Due versioni disponibili: protezione mano (30 mm) e protezione dito (14 mm)
- Le distanze di rilevamento vanno da 0,3 m a 20,0 m
- Altezze da 160 mm a 2.500 mm

## EASY | ADVANCED

### Allineamento estremamente semplice grazie al controllo di solo 2 raggi

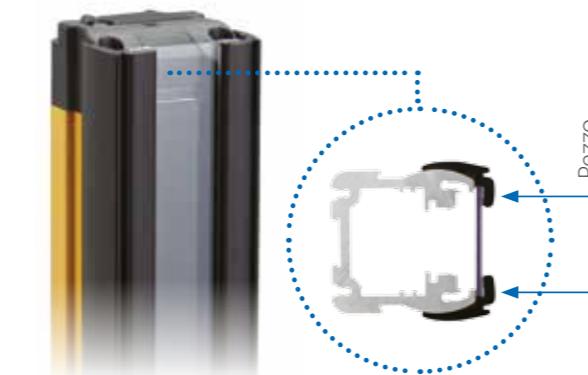

È sufficiente mettere in posizione la barriera fotoelettrica di sicurezza e controllare quando si accendono i LED inferiori e superiori per completare la regolazione.

## EASY | ADVANCED

### Protezione aggiuntiva opzionale

Puoi aggiungere un'ulteriore protezione alla superficie ottica della barriera fotoelettrica di sicurezza F3SG-R con la nostra copertura speciale (F39-HGA e/o F39-HGB) per evitare graffi e altri impatti meccanici.

## EASY | ADVANCED

### Costruita per ambienti polverosi e di lavaggio

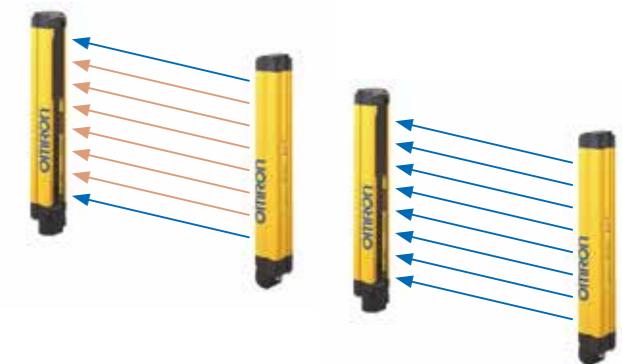

La barriera fotoelettrica di sicurezza serie F3SG-R soddisfa i criteri di protezione IP67 per l'uso in applicazioni con polvere o lavaggio.

## EASY | ADVANCED

### Sincronizzazione automatica emettitore-ricevitore

La nostra sincronizzazione ottica in due fasi non rende più necessario sincronizzare i cavi tra l'emettitore e il ricevitore: un altro risparmio di tempo. Inoltre, il cablaggio flessibile che ne risulta riduce il rischio di disconnessione ed evita le sorgenti di rumore.

## EASY

### F3SG-RE - Versione semplice per la massima convenienza

Abbiamo sviluppato una versione ON/OFF di base ideale per le applicazioni più semplici.

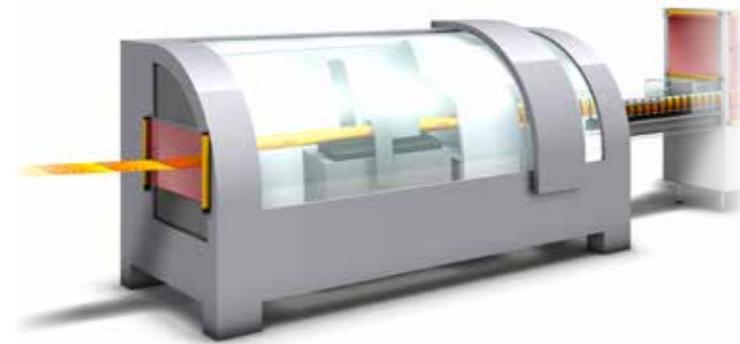

- Tempo di risposta più veloce sul mercato (5 ms) per l'altezza più corta della barriera fotoelettrica di sicurezza
- Cablaggio ridotto grazie ai connettori pre-cablati per un'installazione rapida
- Risoluzione dei problemi semplice e veloce tramite codici QR
- Chiara indicazione ON/OFF mediante LED

# Ottimizza la sicurezza in tutta la linea di produzione con F3SG-RA

## ADVANCED Blanking

Il modello F3SG-RA offre funzioni di blanking flottante e fisso. L'impostazione del numero di raggi può essere configurata specificando il numero di raggi manualmente mediante SD Manager 2 o in utilizzando i DIP switch. Nel caso di utilizzo dei DIP switch, spostando un oggetto opaco nell'area di rilevamento, è sufficiente utilizzare l'interruttore a pressione per eseguire l'azione di programmazione.

## ADVANCED Risoluzione ridotta

Con la risoluzione ridotta, il modello F3SG-RA è in grado di ignorare alcuni raggi interrotti (da 1 a 3 raggi mobili). Questo modifica la capacità di rilevamento della barriera e contribuisce a una sicurezza più flessibile, ad esempio quando ci sono oggetti in movimento all'interno dell'area di rilevamento.

## ADVANCED Connessione a cascata

È possibile connettere in serie fino a tre coppie di F3SG-R. La connessione a cascata consente di utilizzarli come una singola barriera fotoelettrica di sicurezza, soluzione che richiede la connessione ad un unico controllore. Se uno dei gruppi di F3SG-R connessi in serie viene bloccato, entrambe le uscite di sicurezza vengono aperte (OFF).

- Numero di connessioni: fino a 3 coppie
- Numero totale di raggi: fino a 255 raggi
- Lunghezza complessiva dei cavi tra i segmenti connessi a cascata: max 10 m

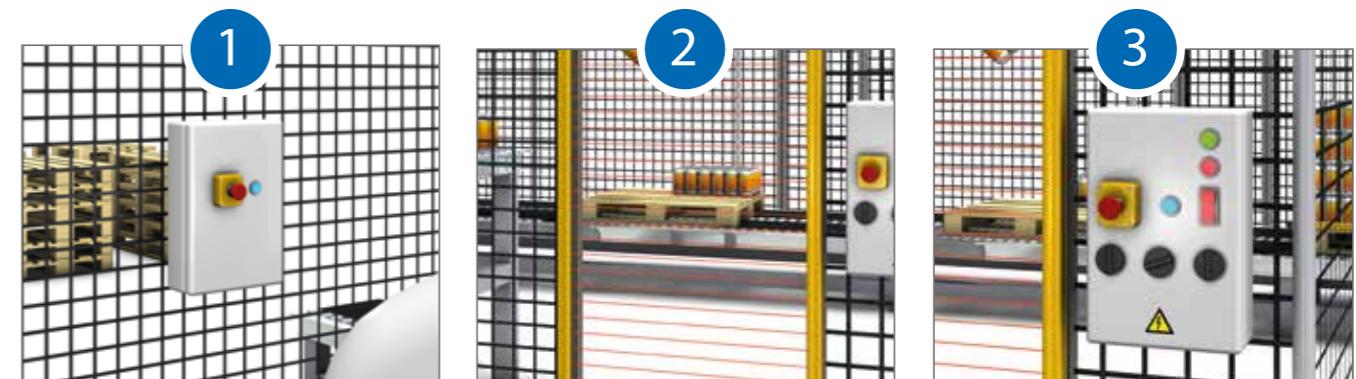

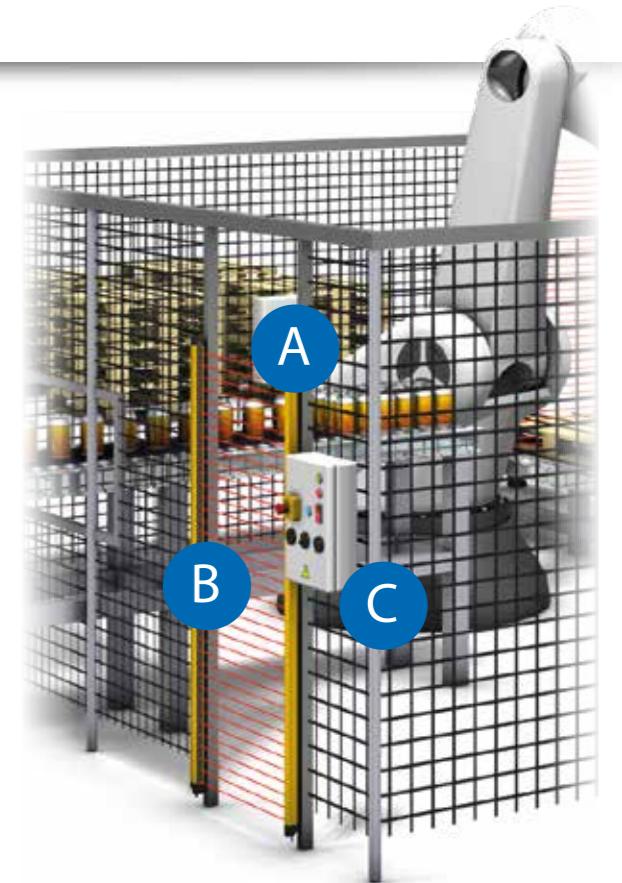

## ADVANCED Pre-reset

Il pulsante Pre-reset impedisce che una macchina venga riavviata quando una persona (non visibile) si trova ancora all'interno della zona pericolosa.

**A** È necessario premere un pulsante Pre-reset locale all'interno della macchina prima che il sistema di sicurezza possa essere ripristinato

**B** Barriera fotoelettrica di sicurezza per un facile accesso, ad esempio con un carrello elevatore

**C** Pulsante Reset per confermare e avviare.

Premere il pulsante Pre-reset all'interno della macchina

Attraversare la barriera fotoelettrica di sicurezza per uscire dall'area pericolosa

Premere il pulsante Reset fuori dall'area pericolosa

# Muting con barriere F3SG-RA

## ADVANCED

È possibile proteggere i sistemi di produzione automatizzata servendosi di elementi fissi; tuttavia, se il materiale entra ed esce da una zona di pericolo, il muting può rappresentare un aiuto sostanziale senza mettere a rischio la sicurezza dell'operatore.

Una gamma completa di opzioni di muting è disponibile con le barriere fotoelettriche di sicurezza F3SG-RA utilizzando accessori standard Omron.

### F3SG-RA offre quattro diverse modalità di muting:

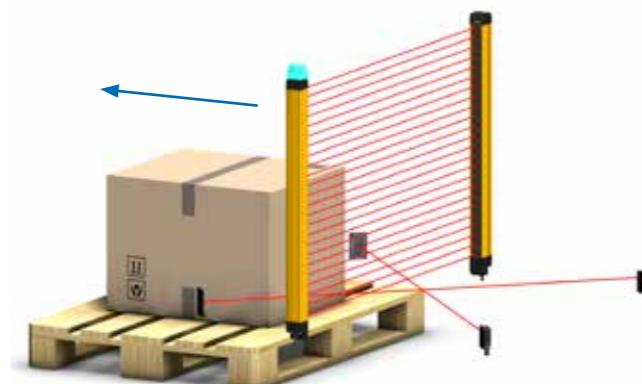

- Modalità di muting standard (muting a T e muting a X)
- Modalità di muting solo uscita (muting a L)
- Modalità di rilevamento della posizione (ad es. il robot è arrestato in una posizione sicura)

Le seguenti impostazioni sono disponibili per mettere in stato di muting un intervallo di raggi.

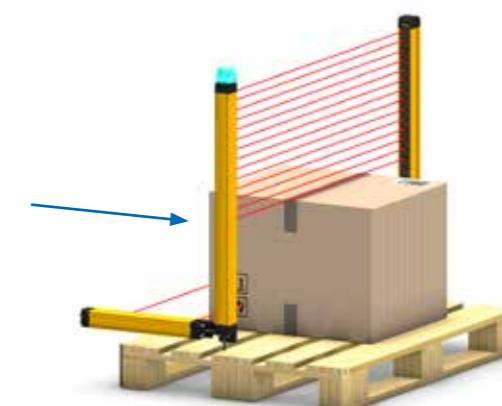

- Muting intervallo completo
- Muting intervallo parziale
- Muting intervallo dinamico

### Muting dinamico

Quando sulla stessa linea vengono trasportati pezzi in lavorazione con altezze diverse, la funzione di muting dinamico impone automaticamente i raggi appropriati in base all'altezza del pezzo in lavorazione.

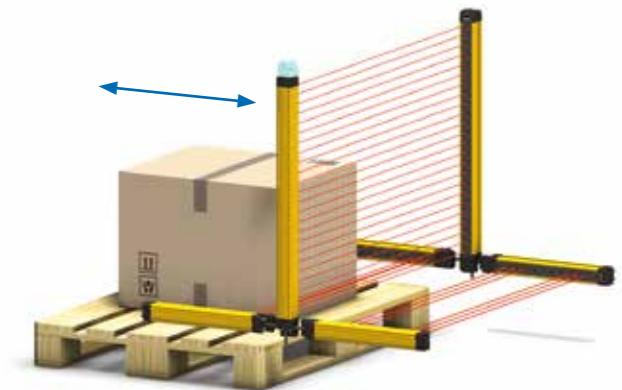

*Muting a X*

*Muting dinamico utilizzato nel muting a L*

## Attuatore di muting intelligente

L'attuatore di muting intelligente estende le funzioni del modello F3SG-RA nelle applicazioni in cui un pezzo in lavorazione vibra avanti e indietro o in cui le merci sul pallet presentano piccoli spazi vuoti.

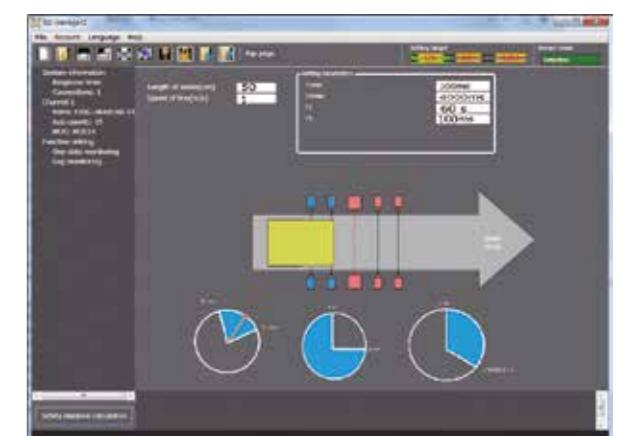

*Attuatore di muting intelligente utilizzato nel muting a T*

## Strumento di configurazione SD Manager2

### Riduzione di errori di impostazione e rilevamento

Lo strumento di configurazione SD Manager2 permette di monitorare lo stato della barriera e programmare le funzioni della barriera. È inoltre possibile analizzare qualsiasi arresto dovuto a errori di muting utilizzando i dati memorizzati nell'unità F3SG-R, per minimizzare i tempi di inattività imprevisti della macchina.

# Elenco di caratteristiche

Funzione	Tipo Advanced F3SG-RA	Tipo Easy F3SG-RE	Impostazione di fabbrica predefinita

### Advanced type for complex safety solutions

The F3SG-RA advanced safety light curtain provides simplicity in mounting, daily use and maintenance.

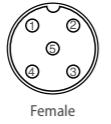

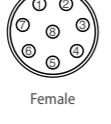

- Torsion-resistant for fast and simple alignment
- Smart-click cable connection for fast set-up and proper torque to ensure IP67
- QR code indication for easy online troubleshooting
- PNP/NPN output selection by DIP switch
- Cascading connection up to 3 segments and up to 255 beams
- Built in blanking, muting and reset functions

**Note:** The operating range of the safety light curtain attached with the product is 10% shorter than the rating.

## Spare parts

Appearance	Type	Specification	Order code
	End cap	Housing color: Black For both emitter and receiver (Attached to the F3SG-R. The end cap can be purchased if lost.)	F39-CNMG

F3SG-RA

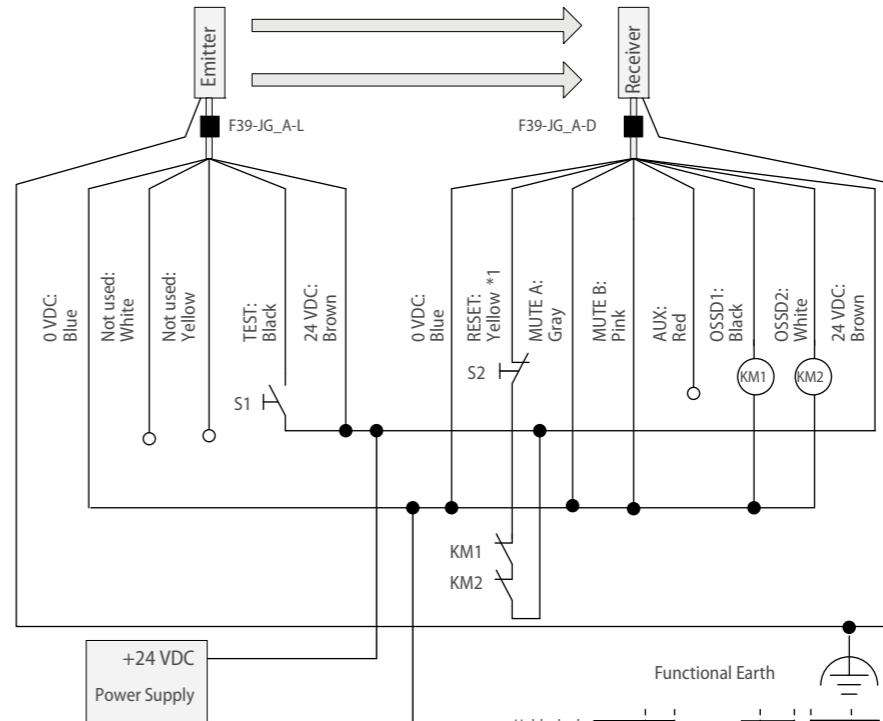

## Specifications

Item	F3SG-4RA F3SG-2RA	-14 -14	F3SG-4RA F3SG-2RA	-30 -30					
Type of ESPE (IEC 61496-1)	Type 4	F3SG-4RA -14/-30	F3SG-4RA F3SG-2RA	-30 -30					
	Type 2	F3SG-2RA -14/-30							
Detection capability (Opaque objects)		14 mm dia.	30 mm dia.						
Protective height		160 to 2080 mm	190 to 2510 mm						
Operating range (Dip switch option)		0.3 to 3.0 m or 0.3 to 10.0 m	0.3 to 7.0 m or 0.3 to 20.0 m						
Effective aperture angle (EAA) (IEC 61496-2)	Type 4	±2.5° max., emitter and receiver at operating range of 3 m or greater	F3SG-4RA F3SG-2RA	-30 -30					
	Type 2	±5.0° max., emitter and receiver at operating range of 3 m or greater							
Light source	Infrared LEDs, Wavelength: 870 nm								
Power supply voltage (Vs)	SELV/PELV 24 VDC ±20% (ripple p-p 10% max.)								
Safety outputs (OSSD)	2 PNP or NPN transistor outputs (PNP or NPN selectable by DIP switch), load current of 300 mA max.								
Cascade connection	Number of cascaded segments: 3 max., total number of beams: 255 max. Total sum of cable lengths between sensors: 10 m max.								
Test function	Self-test (at power-on, and during operation), External test (light emission stop function by test input)								
Safety-related functions	Interlock, pre-reset, external device monitoring (EDM), fixed blanking/floating blanking, reduced resolution, muting/override, scan code selection, PNP/NPN selection, response time adjustment								
Response time	ON to OFF (normal mode): 8 to 18 ms max., OFF to ON: 40 to 90 ms max.								
Ambient temperature	Operating	-10 to 55°C (non-icing)							
	Storage	-25 to 70°C							
Ambient humidity	Operating	35% to 85% (non-condensing)							
	Storage	35% to 95%							
Degree of protection (IEC 60529)	IP65 and IP67								
Material	Housing: Aluminum, Cap: PBT, Front window: PMMA, Cable: Oil resistant PVC, Mounting bracket: ZDC2, FE plate: SUS								
Performance level (PL)/ Safety category	Type 4	PLe/Category 4 (EN ISO 13849-1:2008)							
	Type 2	PLc/Category 2 (EN ISO 13849-1:2008)							
PFHd	$\leq 9.9 \times 10^{-8}$ (IEC 61508)								
Proof test interval T <sub>M</sub>	Every 20 years (IEC 61508)								

**Note:** For more information, please check the user manual Z352-E1

## Connections (Basic wiring diagram)

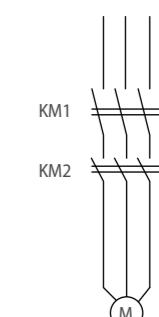

Standalone F3SG-RA using PNP outputs

### [DIP Switch settings]\*2

- Receiver:
  - Manual Reset Mode
  - EDM enabled
  - PNP output

Emitter:  
- 24 V Active

Test Switch  
Lockout/Interlock Reset Switch  
M2: Safety relay with forcibly guided contacts (G7SA) or magnetic contactor  
3 phase motor

can be used as EDM input lines.

The functions are configurable with 'Switch'.

### Easy type for simple ON/OFF detection applications

The F3SG-RE easy safety light provides simplicity in mounting, daily use and maintenance.

- Torsion-resistant for fast and simple alignment
- Smart-click cable connection for fast set-up and proper torque to ensure IP67
- QR code indication for easy online troubleshooting

## Connections (Basic wiring diagram)

## Short mode

## Long mode

<sup>\*1</sup> Refer to user's manual Z352-E1 for more information.<sup>\*2</sup> The safety controller and the F3SG-R must share the power supply or be connected to the common terminal of the power supply.

### Smart muting actuator for muting applications

The F3W-MA smart muting actuator is an integrated sensor system utilizing multiple-beam sensor technology to configure muting systems in combination with the safety light curtain.

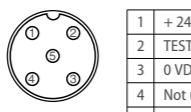

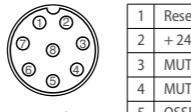

- Point-to-point detection mode for workpieces with constant shape
- Chattering/void space prevention mode to prevent impact of small object holes

#### Ordering information
